Design Specs

The diagram illustrates six variations of checkboxes and their typical uses in user interfaces:

- 1. Unselected:** A simple empty square box.
- 2. Selected:** A square box with a checkmark inside.
- 3. Indeterminate:** A square box with a horizontal line through the middle.
- 4. Label Above:** The text "Label" is positioned above a checked checkbox.
- 5. Label Right:** The text "Label" is positioned to the right of a checked checkbox.
- 6. Label Right Small:** The text "Label" is positioned to the right of a checked checkbox, in a smaller font size.

Uses:

- 1. Unselected:** Allow the user to select one or more items from a set or to turn an option on.
- 2. Selected:** Allow the user to deselect one or more items from a set or to turn an option off.
- 3. Indeterminate:** If some, but not all, child checkboxes are checked, the parent checkbox becomes an indeterminate checkbox.
- 4. Label Above:** Allow the user to select one or more items from a set or to turn an option on.
- Label to be used when checkbox is alone or used in a set.
- 5. Label Right:** Allow the user to select one or more items from a set or to turn an option on.
- Label to be used when checkbox is alone.
- 6. Label Right Small:** Allow the user to select one or more items from a set or to turn an option on.
- To be used when checkbox needs a label but is in a list or group in inputs with size 12px labels.

Size Specs
